## ON DOMINICA'S INVITATION

THAT COUNTRY URGED US TO TASE CHARGE OF ITS FINANCES.

Says That the Danger of Foreign Interference Led It to Comply With the Urgent Request -No Protectorate.

WASHINGTON, Jan. 22.-An official statement issued to-day by the Administration through the State Department makes plain that the action of this Government in assuming charge of Santo Domingo's customs revenues is the initial outcome of President Roosevelt's warning that Latin American countries cannot hope to escape their just international obligations by hiding under the skirts of the Monroe Doctrine. The danger of foreign interference, with probable embarrassment to the United States. was the moving factor in the important course adopted by this country toward Santo Domingo, but it is explained in the Administration statement that in assuming charge of Santo Domingo's customs revenues this Government does so at the express invitation of the Dominican authorities.

That danger of foreign interference was minent is shown by the admission in statement that "more than one of the. eat Powers" had emphatically given

Stotice that if the United States did not administer the Dominican customs these Powers would like to do so, supported by their warships. This pointed suggestion was fraught with too much danger to permit the United States to delay longer in removing the Dominican menace. The important announcement is made also that this Government proposes to guarantee the territorial integrity of Santo Domingo. Fifty-five per cent. of the Dominican revenues are to be applied by the United States to liquidating that republic's foreign

With this declaration J. W. "It is not the purpose of this Government to assume a protectorate over Santo Do-

enues, 45 per cent. of which are to be returned to the Dominican Government for its current expenses.

"The balance is to be used to meet the interest charges on the acknowledged bonded indebtedness and other just obligations of the republic. Any surplus will be turned over to the Dominican Government. The obligations representing the bonded indebtedness are largely owned

by foreign creditors. The Government of the United States does not guarantee the debts of Santo Domingo, or agree to provide for the payment of them, but only promises to try to so organize and adjust the fiscal adminis tration of the country that their liquidation may be accomplished automatically and

on a basis of equity toward all creditors. "It is believed that if the Dominican revenues are wisely collected and disbursed all legitimate claims against the republic will ultimately be satisfied.

"In this connection it may be added that under the award of the tribunal of arbitration of July 14, 1904, between the United States and Santo Domingo, in the sum of about \$4,000,000. the United States was given the right eventually to take possession of the four principal ports on the northern side of the island, and under the award the fiscal agent appointed by the United States is now in possession of the important custom house at Puerto Plata.

The unfortunate financial condition of Santo Domingo has more than once in the last decade brought the United States Government face to face with questions fraught with imminent peril.
